ACDEMIC SESSION 2018-19

DEPARTMENT OF PHYSICS

TITLE: MOBILE REPAIRING CERTIFICATE COURSE

This report provides an overview and evaluation of the Mobile Repairing Certificate Course offered by Department of Physics, Arts, Commerce and Science College Maregaon for BSc students. These 30 days course was started on 01 March 2019 and completed on 30 March, 2019. Total 20 students successfully completed this course. The purpose of the course is to equip participants with the necessary skills and knowledge to repair and troubleshoot mobile devices effectively. The report examines the course curriculum, teaching methodologies, practical training, and overall effectiveness of the program.

This Course covers a comprehensive range of topics essential for mobile device repair. Participant students are introduced to the fundamental concepts of electronics, including circuitry, components, and tools used in mobile devices. The course provides an in-depth understanding of mobile hardware components, such as displays, batteries, cameras, and connectors. Participants learn how to disassemble, repair, and replace faulty hardware. Students gain knowledge of mobile operating systems, firmware, and software-related issues. They learn how to troubleshoot software problems, perform software updates, and install applications. Participants are taught various techniques to diagnose and rectify common mobile device faults. They learn how to use diagnostic tools, identify hardware and software issues, and implement appropriate solutions. This course also covers advanced repair techniques, including soldering and desoldering, water damage recovery, and component-level repairs.

Students are assessed through a combination of practical exams, theoretical tests, and project work. The assessment criteria are designed to evaluate their understanding of concepts, troubleshooting abilities, and repair skills. Successful participants receive a Mobile Repairing Certificate upon completion of the course, enhancing their employability prospects.

Mobile Repairing Certificate Course has proven to be highly effective. The course offers comprehensive coverage of mobile device repair and equips participants with the necessary skills to enter the industry confidently. The

combination of theoretical knowledge, practical training ensures a well-rounded learning experience. The Mobile Repairing Certificate Course provides a solid foundation in mobile device repair and prepares participants for a career in the industry. The course curriculum, teaching methodologies, and practical training are well-structured. Overall, the Mobile Repairing Certificate Course serves as an excellent platform for individuals seeking to acquire the skills required for mobile device repair.

DEPARTMENT OF PHYSICS

**TITLE OF CERTIFICATE COURSE: PLASTIC MATERIALS & MODERN PLASTIC
PROCESSING TECHNIQUES**

REPORT (01 March 2022 to 30 March 2022)

The Certificate Course on Plastic Materials & Modern Plastic Processing Techniques was designed to provide students with comprehensive knowledge and practical skills related to plastic materials and the latest processing techniques. The course aimed to enhance their understanding of the properties, applications, and manufacturing processes involved in the plastic industry. This course provides an overview of

modern plastic processing techniques and their applications and develop practical skills in plastic processing through hands-on workshops and demonstrations. The students are educated about the environmental impact of plastic materials and sustainable practices in the industry. The course content was carefully crafted to cover a wide range of topics related to plastic materials and processing techniques. The course was delivered through a combination of lectures, hands-on workshops, practical demonstrations, and interactive discussions. Students had the opportunity to engage with experienced trainers and industry professionals who shared their expertise and insights. The course also incorporated site visits to plastic manufacturing facilities, providing participants with practical exposure to real-world operations. Upon successful completion of the course, participants were awarded a Certificate of Completion. The certificate serves as a recognition of their commitment to professional development in the field of plastic materials and modern plastic processing techniques. The Certificate Course on Plastic Materials & Modern Plastic Processing Techniques was a resounding success. It provided participants with a comprehensive understanding of plastic materials, processing techniques, and industry best practices. The course equipped them with practical skills that are vital for career advancement in the plastic industry. We extend our appreciation to all the participants, trainers, and supporting staff who contributed to the success of this course. These 30 days course was started on 01 March 2022 and completed on 30 March, 2022. Total 58 students successfully completed this course.
